

This seed is treated with

Excalibre SATM
Encapsulated Inoculant

with **iGET**TM Technology
Induced Gene Expression Triggers

Excalibre-SA contains an encapsulated triple stack Rhizobia package for optimum N-fixation, plus Trichoderma microbials for improved crop stress resistance and enhanced water and nutrient efficiency.

CAUTION: Excalibre-SA may be used either on untreated seed, or seed that has been treated with a fungicide or insecticide. Wear appropriate protective gear, avoid skin contact or breathing of dust, and follow the caution statements of the other treatments if the seed has been pre-treated. Individuals allergic to molds and or fungi should take precautions to avoid contact with the eyes or skin. To minimize risk of allergic exposure, individuals should wear standard protective clothing and equipment including gloves, safety glasses, and an NIOSH approved respirator. In case of allergic contact with eyes or skin, immediately flush the exposed area with water. Seek medical attention if irritation develops or persists.
